BELMOGTWIN MKII TRIPMETER (1)

A completely mechanical tripmeter with two illuminated digital counters, designed specifically for use on classic rallies in accordance with international FIVA and FIA regulations. There are two versions. This one shows the two readouts side by side (205mm wide x 100mm high)

091.550

£670.80 each | £559.00 ex VAT

BELMOGTWIN R TRIPMETER (2)

A completely mechanical tripmeter with two illuminated digital counters, designed specifically for use on classic rallies in accordance with international FIVA and FIA regulations. This one looks like the original Halda with the two readouts one above the other (112mm wide x 129mm high)

094.574

£1176.00 each | £980.00 ex VAT

BELMOG GPS TRIPMETER

This Tripmeter requires no installation (cable or wheel sensor) and no calibration. You just plug it into a 12 volt negative earth cigar lighter and it works. Supplied with 1.5m power cable and a magnetic mounted internal/external antenna. More accurate than 'normal' GPS receivers, it tracks up to 50 satellites simultaneously. Can be switched between kilometers, miles and nautical miles (so that it can be used on boats). Distance lost due to signal blackout such as tunnels is compensated once the satellites become available again. The display is highly visible both at night and in sunshine, and shows intermediate distance, total distance, speed (updated 4 times a second) and average speed

094.665

£766.80 each | £639.00 ex VAT

RIGHT ANGLE DRIVE FITTING KIT

The Belmogtwin can be fitted to all makes of car. To make fitting easier on some cars we offer this right angle drive. Instead of the cable coming in to the left of the tripmeter, it can come in from the back or from below by using this right angle drive

091.587

£86.23 each | £71.86 ex VAT

BELMOG FITTING KITS

The Belmogtwin 091.550/094.574 can be fitted to all makes of car. In addition to the tripmeter you will need a fitting kit, which consists of a T gear, cable and clips and fits to the back of the speedometer between the speedometer and the cable. Fitting Kit for:

80mm Smiths speedometer

091.552

£168.00 each | £140.00 ex VAT

GPS SENSOR FOR ELECTRONIC TRIPMETERS BY BELMOG

This Sensor makes it possible to use an electronic tripmeter (091.953, 091.954) without the need to install a cable or wheel sensor and to change it to another car without the need to recalibrate. More accurate than 'normal' GPS receivers, this instrument tracks up to 50 satellites simultaneously and sends over 8,000 pulses per minute. A little black box, 6.5cm x 5cm x 2cm, it needs to be mounted on the dashboard or rear window sill to pick up the signal. For 6 or 12 volts

094.652

£208.80 each | £174.00 ex VAT

GAUGEPILOT PRO

Temperatures

Twinmaster

MPH/KPH

Rallymaster

GaugePilot Pro is the ultimate on-board information system for the classic owner or motor-sport competitor. With a crystal clear LCD non-reflective display, fitted into a period perfect unit it complements the cockpit of any classic vehicle. The GaugePilot constantly monitors and informs via intuitive software applications. Supplied with installation bracket and fitting kit to enable you to fit GaugePilot to your vehicle. The kit includes sensors for oil pressure, water or oil temperature, ambient temperature and wheel speed together with all necessary plug sockets and connecting pins. This kit allows monitoring of engine systems and provides functions for timing and average speed in the same manner as the classic Halda Mechanical systems. Includes everything in the On The Road Kit sold separately under Part No. 099.104. Further sensors can be added at a later date to expand the functionality of GaugePilot

With black bezel

099.100

£1399.00 each | £1165.83 ex VAT

With polished bezel

099.101

£1399.00 each | £1165.83 ex VAT

For Classic Motoring. Enjoy peace of mind that GaugePilot is constantly monitoring the critical outputs of the engine. Displayed as classic gauges, with on screen and audible warnings, you are informed immediately that something is wrong and can safely stop in plenty of time to prevent your engine from expensive damage. GaugePilot also has ambient temperature monitoring and ice risk warning for your added safety. When touring, easily switch GaugePilot's speedometer from Miles to Kilometres and set your max speed warning to the enforced limits.

Service Reminders help you to build reliability and promotes safety by storing all maintenance information and alert when routine servicing is due

For Rallying. GaugePilot is the ultimate in legal navigational equipment with multiple Rally computers and stopwatches to help you be spot on. Dimensionally identical to a 1950s Speed-Pilot the GaugePilot looks the part in any classic rally car. Set up, calibration and use is simple, whilst you can easily change between Kilometres and Miles and switch between home and roadbook calibration. Rally applications include; Twinmaster, a digital emulation of the classic Halda instrument; Speedpilot, an average speed computer with single odometer; Stopwatch, two independent stopwatches, accurate to 1/8 of a second. Tested over 10,000 miles in some of the world's premier classic rally events, including the Rallye Monte-Carlo Historique, Mille Miglia, Trans America Challenge, Icelandic Saga, Classic Marathon and in Holden's ex works Sunbeam Tiger in the Tour Ireland

GAUGEPILOT PRO HEAD UNIT ONLY

GaugePilot Pro Head unit This item is the GaugePilot unit on its own, supplied without any of the fitting kit, allowing you to purchase components individually to tailor your GaugePilot installation above and beyond our standard "off the shelf" kit

With black bezel

099.102

£1200.00 each | £1000.00 ex VAT

With polished bezel

099.103

£1200.00 each | £1000.00 ex VAT

GAUGEPILOT ON THE ROAD KIT

This kit contains all the necessary components to install and wire up your GaugePilot Pro. It includes ambient temperature sensor, coolant or oil temp sensor, speedo cable pulse sensor, oil pressure sensor, under dashboard mounting bracket, wiring loom with connectors, warning buzzer (6-12 volt) and warning light (6-12 Volt)

099.104

£199.00 each | £165.83 ex VAT

GAUGEPILOT PRESSURE SENSOR KIT

GaugePilot pressure sensor kit allowing installation of an additional pressure sensor to your GaugePilot. This kit will allow you to add a fuel pressure sensor for example. The sensor is of a type that can monitor from 0 to 150 psi, and can be used for either fuel or oil pressure monitoring. The kit includes includes connector, crimp terminals, and 3 x 3m of labelled wire with pre-installed terminals to insert into the GaugePilot loom connector. The thread is 1/8 NPT

INTERNATIONAL 1 TRIPMETER

Approved for many Historic or Retrospective rallies worldwide which require mechanical tripmeters. Calibrated by the user, manually setting switches in the base of the unit. Can be calibrated to read miles or kilometres. The electro-mechanical readout clicks over at precisely one hundredth of a mile or kilometre. It can be zeroed by pushing resets on the front. Night lighting is from the top of the meter. 120 x 70 x 55 mm. You will also need a sensor either 091.957, 091.958 or 091.905

091.977

£127.01 each | £105.84 ex VAT

INTERNATIONAL 2 'PRO' TRIPMETER

This tripmeter relies on an electrical signal which is then processed electronically. Highly accurate. Ideal for stage rallies where dual readout is required. Can be calibrated to read hundredths of miles or kilometres. Calibrated by the user, manually setting switches. Will read up or down. A remote reset button is provided to zero the lower display in case the meter cannot be reached by the co-driver. 120mm x 100mm x 45mm. You will also need a sensor either 091.957, 091.958 or 091.905

091.953

£169.34 each | £141.12 ex VAT

INTERNATIONAL 2 S 'PRO' TRIPMETER

This tripmeter relies on an electrical signal which is then processed electronically. It has all the features of 091.953 plus an extra readout, a 3 digit speedometer. This is automatically calculated from the distance calibration. Useful if your speedo is in miles and you need kilometres. By moving a switch this can be switched to average speed and back and forth from speed to average speed. Size 120mm x 100mm x 50mm. You will also need a Sensor either 091.957, 091.958 or 091.905

091.954

£209.03 each | £174.19 ex VAT

RETROTRIP 2 CLASSIQUE - TRIPMETER

Approved for many historic or retrospective rallies worldwide the Retrotrip 2 Classique is classed as an electro-mechanical tripmeter, and has twin displays, total and inter, which can be zeroed independently. The Retrotrip 2 is fitted with display lenses to slightly increase the digit size. It has a 12 volt illumination. The Retrotrip 2 Classique is easily installed and easily calibrated for any vehicle, gear ratio or tyre size. Size 129mm x 70mm x 65mm. You will also need a Sensor either 091.957, 091.958 or 091.905

091.928

£297.11 each | £247.59 ex VAT

RETROTRIP 3 CLASSIQUE - TRIPMETER

(Left) An evolution of the RetroTrip 2 Classique tripmeter, see left. This model comprises two separate tripmeters fed from a single sensor. One tripmeter drives the two counters on the top row, whilst a second drives the third readout at the bottom. The third can be calibrated to give an indication of average speed. All counters can be zeroed independently. Night lighting is from the top of the meter. You will also need a sensor please refer to 091.957, 091.958 or 091.905

091.956

£393.24 each | £327.70 ex VAT

SENSOR FOR SPEED CABLE

This sensor is for use with all RetroTrip tripmeters and all cable driven speedometers. It is necessary to cut the speedo cable outer to fit the sensor. Full instructions supplied with the unit

091.957

£35.64 each | £29.70 ex VAT

WHEEL SENSOR

For use with RetroTrip tripmeters this wheel sensor normally senses the bolts holding the brake disc to a rotating hub. Can also be used to detect rotating drive shafts or drum brakes with targets attached. It will detect any metallic target and is unaffected by dirt, mud etc. Thread is M12 x 1. It requires precision fitting. Before ordering refer to 091.905

091.958

£35.64 each | £29.70 ex VAT

SENSOR FOR PROPSHAFT

Comprises two magnets with hose clamps that you fit either side of the propshaft and a sensor that must be about 5 to 15 mm from the magnets. Thread is M8 x 0.75. Comes with full fitting instructions. You may find this easier to install than 091.958 as the design can accommodate larger clearances between rotating components

091.905

£79.20 each | £66.00 ex VAT

PLUG KIT FOR RETROTRIP

To make the electrical work involved in fitting a RetroTrip simpler, we offer a plug kit. This allows the meter to be removed from the car when not rallying, simply by unplugging a connector from the back of it. The kit contains a fused 12 volt power connection (the black cable) and the lead to the sensor (grey), with appropriate spade connectors

091.959

£33.61 each | £28.01 ex VAT

PRESCALING INTERFACE FOR RETROTRIPS

To enable you to safely drive Retrotrips from digital pulse supplies found on vehicles fitted with digitally pulsed electronic speedometers in place of other sensors. Comes with instructions

091.978

£55.20 each | £46.00 ex VAT

RECOMMENDED POWER CONDITIONER FOR RETROTRIPS & TRIPMETERS

RetroTrip and International tripmeters require a reliable voltage source to function properly. This conditioner has been designed to provide this, especially if you car is fitted with a dynamo or is 6-volt. It connects to the battery terminals, and has an internal fuse which disconnects the power for 30 seconds and then re-connects if the unit is overloaded. It is intended to supply only a tripmeter. If you purchase one of these tripmeters we RECOMMEND that you fit this

091.976

£43.57 each | £36.31 ex VAT

OTHER USEFUL ITEMS

MPH TO KPH CONVERTER

If you are going on a European rally or visit, this device fits between the speedo cable and the speedometer of your car and instantly converts it to read in KILOMETRES instead of MPH! Fits standard Smiths screw fitting speedos

091.549

£147.00 each | £122.50 ex VAT

SPEEDTABLE

(Right) Use the four mechanical push switches to set the average speed in either mph or kph to one decimal place, where upon the readout gives you the reading which is required on your tripmeter to average that speed. Press Z at the start and keep your car's tripmeter up with the speedtable figure! While L is pressed the digits are backlit for night use. Uses PP3 9 volt alkaline battery. Self contained and requiring no connection to the car. 105mm x 60mm x 27mm

091.859

HANHART STOPWATCH FOR SPECTATORS

55mm diameter black plastic case with black markings on a white background. Green button for start and restart. Red button for stop, and black button for reset. Fifth of a second calibrations. Small dial records up to 30 minutes. 1 Jewel shock resistant and antimagnetic movement made by Hanhart with 1 year warranty. Lanyard for hanging watch around your neck

090.229
£59.10 each | £49.25 ex VAT

HANHART 10 HOUR STOPWATCH

55mm diameter chrome case with black on white markings. Left hand button for reset and crown operation for start/stop. Fifth of a second calibrations. Red jumping minute hand records up to 60 minutes. Small dial records up to 10 hours. Precision shock protected 11 jewel lever movement made by Hanhart with 1 year warranty. The best available for regularity

090.240
£295.90 each | £246.58 ex VAT

DASHBOARD HANHART CLOCK

This high quality Hanhart 1930s inspired mechanical dashboard clock matches the classic Hanhart Stopwatches, and is based on the classic Hanhart pocket watches. It works in conjunction with dashboard mounts and has a polished case with a black face. The Hanhart Classic Dashboard Clock size is 55mm dia.

094.204
£565.40 each | £471.17 ex VAT

HANHART CLASSIC I STOPWATCH

55mm diameter with matte (satin) chrome plated case. Classic white markings on a black background. Left hand button for reset and crown operation for start/stop. Fifth of a second calibrations, small dial records up to 30 minutes. Precision 7 jewel lever movement made by Hanhart with one year warranty. Weight 120g

090.237
£165.40 each | £137.83 ex VAT

HANHART CLASSIC II STOPWATCH

55mm diameter with matte (satin) chrome plated case. Classic white markings on a black background. Crown operation for starting and stopping of the two hands. Left hand button for reset. Right hand button stops and catches up double hand for split timing. Fifth of a second calibrations, small dial records up to 30 minutes. Precision 7 jewel lever movement made by Hanhart with one year warranty. Weight 120g

090.238
£267.60 each | £223.00 ex VAT

STOPWATCH 1 HOUR

(Left) A white dialed budget price mechanical 1 hour stopwatch with 16 jewels, made in Russia

090.243
£67.20 each | £56.00 ex VAT

HANHART STOPWATCH BRACKET

Made by Hanhart in chrome plated brass. The watch sits on the two lower brackets and clips into the top bracket being held in place by two small sprung loaded balls. Fixing screws supplied

For one Stopwatch

094.205

£150.00 each | £125.00 ex VAT

CLIP FOR ONE STOPWATCH

Adjustable watch clip for single stopwatch, 55mm diameter or thereabouts. Requires 5mm hole in panel or board

091.945

£11.16 each | £9.30 ex VAT

RALLY SUNDRIES

CLIP-ON PEN/PENCIL SLEEVES

Two pen/pencil sleeves for clipping on to mapboards or a convenient point in the car. Know the whereabouts of your pens or pencils and have them to hand ready to use

094.372

£4.50 each | £3.75 ex VAT

SPEED TABLES

Some rallies have regularity sections which have to be traversed at a set average speed between two or more timing points. For these events you will find that these books are a great help. These four books have 194 or 196 pages designed and laid out by ace navigator Don Barrow:

UP TO 49.99 MILES AVERAGE SPEED TABLE

This book covers all distances from zero to 49.90 miles

090.404

£30.00 each | No VAT

ABOVE 50 MILES AVERAGE SPEED TABLE

This book covers distances from 50 to 99.90 miles

090.405

£30.00 each | No VAT

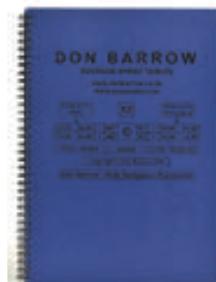

UP TO 49.80KM AVERAGE SPEED TABLE

This book covers all distances from zero to 49.80 kilometres

090.407

£30.00 each | No VAT

ABOVE 50KM AVERAGE SPEED TABLE

This book covers distances from 50 to 99.80 kilometres

090.408

£30.00 each | No VAT

DON BARROW POTTI MK RB8

The most successful road/rally navigator ever, Don Barrow, invented this map reading aid, the Potti. A light excluding tube with large crystal glass magnifying lens for your map reading. One control provides adjustable clear or red light for day or night use. 118 mm diameter and 106 mm height. Supplied with Captain Hook (refer to 090.403) for safe storage. Uses two bulbs LLB272. Essential for serious navigators.

090.400
£126.00 each | £105.00 ex VAT

DON BARROW POTTI 'CAPTAIN HOOK'

For safe storage of Potti within your car when not in use. Colour black. Supplied with screws

090.403
£7.20 each | £6.00 ex VAT

CLEAR MEASURING SCALE

For maps of scales 1:25,000/1:50,000/ 1:100,000 and 1:200,000. Size 5 inches x 3 5/8 inches

091.838
£10.80 each | £9.00 ex VAT

BASEPLATES		
<i>These Baseplates clip into the bottom of the Don Barrow Potti enabling you to read off distances</i>		
1:100000 Scale	Read off distances on the map in either miles ($\frac{1}{10}$ ths) or kilometres	091.822
1:150000 Scale (km)	Read off distances on the map up to 15 kilometres in 0.5 kilometres	094.370
1:200000 Scale	Read off distances on the map in either miles ($\frac{1}{10}$ ths) or kilometres ($\frac{2}{10}$ ths)	091.823
1:250000 Romer	Read off distances on the map in either miles ($\frac{1}{10}$ ths and fractions) or kilometres ($\frac{1}{10}$ ths)	091.824
1:250000 Scale (Km)	Read off distances on the map in either miles (fractions) or kilometres ($\frac{1}{10}$ ths)	091.825
1:50000 & 1" Romer	Read off distances in kilometres up to 5 km, or on a 1" to the mile map in miles up to 5 miles. (The latter is to the scale of 1:63,360)	091.821
1:50000 Romer	Read off distances on the map in either miles (up to 1 $\frac{1}{2}$) or kilometres (up to 2 $\frac{1}{2}$)	091.820
Compass Headings Baseplate	Read off compass headings N, S, E and W	094.373
Trainer 1:50000	Read off distances on the map in either 100 yards, $\frac{1}{10}$ ths of a mile or fractions of a mile	091.826
