SANDWICH TYPE HEATER/BLOWER

- 12V operation, heat output 4kw.
- This heater can either be used as a recirculating type, or it can be split so that the element is on the engine side of the bulkhead and the fan box is inside the car.
- Two outlets for demisting (uses 13/4" dia. plastic hose).
- One door to control heat into the car.
- Supplied complete with 3 metres of water hose and clips, 2 metres of demist hose and wire clips, 2 metres of cable and 3 position switch.
- Fitted to Morgans and similar cars.

SD/080.511

£444.96 each | £370.80 ex VAT

It is possible to change the configuration of the side panels by using the options below:

Single Demist Outlet

SD/080.551

£9.46 each | £7.88 ex VAT

COMPACT HEATER

Have nice warm feet! Easy to install 4kw Heater, 275mm wide, 115mm tall and 200mm deep. 12 volt operation with two 13mm diameter stubs to connect to your engine cooling system. (No provision for demisting)

SD/080.512

£182.40 each | £152.00 ex VAT

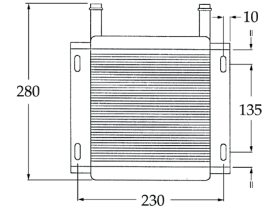

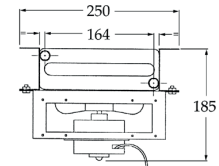

COMPACT HEATER

A compact 4kw Heater. 252mm wide, 115mm tall and 256mm deep. 12 volt operation with two 16mm (5/8") diameter stubs to connect to your engine cooling system. Two adjustable outlets and two 32mm (1 1/4") demist outlets

SD/080.513

£238.80 each | £199.00 ex VAT

SPARES FOR CLAYTON HEATERS

FAN MOTOR SINGLE SHAFT

With 1/4" shaft at one end. Can be connected to run in either direction

080.514

£67.20 each | £56.00 ex VAT

FAN MOTOR DOUBLE SHAFT

With 1/4" shaft at both ends. Can be connected to run in either direction

080.545

£74.40 each | £62.00 ex VAT

3 BLADE FAN

(Left) Plastic fan secured by grub screw onto a 1/4" shaft, 172mm (6.75") diameter

080.555

£9.54 each | £7.95 ex VAT

4 BLADE FAN

(Right) Aluminium fan secured by grub screw onto a 1/4" shaft, 152mm (6") diameter

CIRCULAR HEATER

- 12V operation
- Heat output 2kw
- With or without a demist facility
- Water pipes straight or bent at 90°
- You can reassemble them with the pipes anywhere around the circle
- Two doors to control heat into the car
- Nice period appearance
- Finished in grey hammered enamel
- Overall diameter 210mm
- Demister outlets use 1 1/4" dia hose
- This is probably the easiest type of heater to fit if your car never had a heater
- Ideal for kit cars

With straight pipes and no demist facility

080.500 £381.83 each | £318.19 ex VAT

REPLACEMENTS FOR SMITHS' CIRCULAR HEATER ELEMENTS

The elements originally made by Smiths were of three depths, 2 1/4", 3" and 4". The replacement elements made by CLAYTON are 2 7/8" in depth but come with three new clips which enable you to reassemble your heater with the new element (there is one exception to this, a 4" deep element, made to special order, for early Austin Healeys). A small adjustment to the fan position on the motor shaft may be required. The copper construction and improved water flow through the new element produces a substantial heat output and it will not corrode like the original steel unit

Without motor plate

Available with or without motor plate:

SLIMLINE ELECTRIC FANS

	A series of 12V slimline electric fans for fitting to the front (blowers) or to the rear (suckers) of your radiator to provide cooling. Supplied with a variety of adaptors and instructions to enable you to fit the fan to your car. (A switch or thermostatic control are not included). For 12 volt negative earth only. Made in China			
	Size	Part No.	Price each	Price ex VAT
	9" Blower for engines up to 1200cc	080.900	£69.70	£58.08
	10" Blower for engines up to 2000cc	080.901	£72.47	£60.39
	12" Blower for engines over 2000cc	080.902	£75.28	£62.73
	9" Sucker for engines up to 1200cc	080.905	£69.70	£58.08
	10" Sucker for engines up to 2000cc	080.906	£72.47	£60.39
	12" Sucker for engines over 2000cc	080.907	£75.28	£62.73

FITTING KIT

(Left) Comprises 4 pull throughs and fixings, also a selection of mounting brackets. Apart from providing spares, this Kit enables you to transfer your electric fan from one car to another

080.908
£14.40 each | £12.00 ex VAT

THERMOSTATIC SWITCH

(Right) This switch is for mounting near the top hose and allows you to set the temperature at which the fan comes on. It includes a probe which you fit inside the end of the top hose

080.909
£38.40 each | £32.00 ex VAT

ELECTRIC WATER PUMPS

ELECTRIC WATER PUMP 80 LITRES PER MINUTE

(Right) A new concept in water pumps for pumping cooling water around your engine. Suitable for normally aspirated engines up to 5 litres. It is supplied here in kit form to replace your existing belt driven water pump. You can just switch it on and off when required or use an adjustable electronic controller which supplies the exact voltage to govern water pump speed to achieve desired cooling requirements (Supplied separately refer to 080.781). The pump may be fitted in any location where it can be connected into the bottom hose. Adapters are supplied in this kit to suit various hose diameters. The existing pump can be left in place - instructions for this are provided with the kit. 2 years manufacturer's warranty

080.780
£198.14 each | £165.12 ex VAT

ELECTRIC WATER PUMP CONTROLLER

(Left) This electronic controller is designed to be used with water pump 080.780 and mounted under the dashboard where the adjustments can be reached. It can be set to switch the pump on at 75, 80, 85, 90 or 95 deg C. The temperature sensor can either be inserted into the existing thermostat housing for which an 11mm drill and ¼ BSP tap are needed, or fitted into the top hose for which adaptors are provided. Either way the existing thermostat is removed. If you wire it to the battery side of the ignition switch it will allow the pump to run on after the engine has been switched off to cool it down after a run. Comprehensive instructions, wiring diagrams, wiring and connectors are all supplied

080.781
£197.53 each | £164.61 ex VAT

ELECTRIC WATER PUMP 115 LITRES PER MINUTE

(Right) Suitable for engines over 5 litres and modified engines. It is supplied here in kit form, complete with adjustable electronic controller, to replace your existing belt driven water pump. The controller can be set to switch the pump on at 75, 80, 85, 90 or 95 deg C. The pump may be fitted in any location where it can be connected into the bottom hose. Adapters are supplied in this kit to suit various hose diameters. The existing pump can be left in place - instructions for this are provided with the kit. 2 years manufacturer's warranty
